Appeals: Building valuation data may be appealed by one of the following methods:

1. Upon issuance of a Certificate of Compliance the permit holder may submit final documentation of all building construction costs to include structural, electrical, plumbing, mechanical, interior finish, normal site preparation, architectural and design fees, overhead and profit. Documentation will be compared to ICC Square Foot Construction Costs to determine if the initial building valuation was accurate. All documentation that verifies a difference of more than 10% from the initial building valuation data to the actual completed cost of construction can be appealed for a refund of a portion of the permit fees initially paid.
2. Permit applicants may appeal valuation data by submitting a Cost of Construction claim form to the Catawba County Permit Center at time of permit issuance. This form shall be sealed and certified by a North Carolina registered design professional engaged in the project. The contractors and design professionals shall also agree to supply the County with all change orders that occur during project construction. Prior to issuance of a Certificate of Compliance the permit holder will be responsible to reimburse Catawba County for any additional permit fees that may be assessed due to change orders that increase the value of the building by more than 10% of the original cost of construction.

Structure values which are not identified by the International Code Council Building Valuation Data will be based on the contractor's estimate and using the permit fee multiplier with a minimum building permit of \$88.00. Examples of such structures are swimming pools, signs, cell towers, solar arrays, wind turbines, hydrogen cells, private piers, etc.
